**NOTE:** Remember this is a celebration. We can all participate and thus contribute to the ripples of right intention which will go out beyond us and the special space of this gathering. The intention here is not so much about deep thought and complex ideas but rather to excite the sensuous. To express our joys, bath our perceptions, receive in song and laughter, cleanse in tears and spring water, to walk among gardens, warm by a fire, reflect among the trees and immerse together in life's river as we affirm and celebrate this wondrous creation to which we belong.
